Material handling automation system integration

Century Conveyor Systems transforms
your post-production distribution facility
with cutting-edge automation.

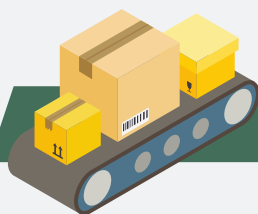

We advance.

Automate and Accelerate

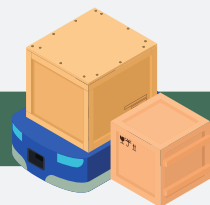

As a full-service facility automation integrator, Century can provide a multitude of material handling solutions based on your distribution or production facility requirements. Our system engineers design, validate, and implement new systems, increasing output, and lowering labor costs with the deployment of cutting-edge automation.

Material Handling Automation Capabilities

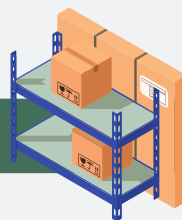

Conveyor Systems

Belt and roller conveyors, sortation and crossdocking systems, trailer extendables, and pallet handling conveyors.

Robotic Fulfillment

Automatic guided vehicles (AGV) and autonomous mobile robots (AMR).

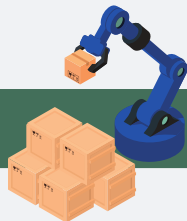

Storage Modules

Shelving and racking, ergonomic picking and packing solutions, automatic storage and retrieval systems, mezzanines and platforms

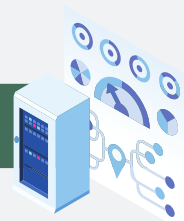

Conveyor Parts & Service

Repair and preventative maintenance services for conveyor systems. Parts and equipment quotation and installation.

Robotic Palletizing

Palletizing and depalletizing arms, robotic cells, shrinkwrappers and strappers.

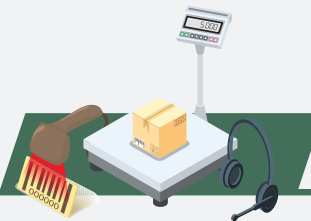

Controls & Software

Control panel fabrication, programmable logic controls (PLC), Warehouse Management Systems (WMS) and Warehouse Control Systems (WCS).

Print & Apply

Case formers, sealers, erectors, dunnage dispensers and fillers, tapers, shipping label applicators and terminals.

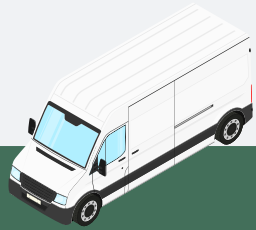

Scanning & Weighing

Voice-to-pick and scanning handhelds, scan towers, scales, and dimensioners.

Complete Conveyor Care

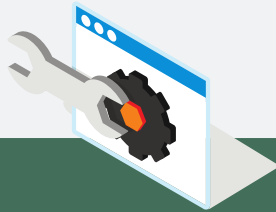

Century's conveyor service covers mechanical, electrical, and control needs via our licensed experts. We handle installations, corrective, and preventative maintenance on conveyor systems both large and small.

Conveyor Service and Parts Capabilities

On-site Maintenance

Century technicians will travel to your warehouse or facility to complete service tasks or repairs.

Remote VPN Support

Certain errors can be remedied without being on-site. A support technician can remotely troubleshoot your system via a controls terminal.

Parts & Equipment

Century offers a wide variety of conveyor replacement parts to improve the reliability and effectiveness of your system.

24/7 Emergency Repair Service

In the event of a system outage, Century can dispatch technicians to diagnose and service your equipment in an effort to minimize loss.

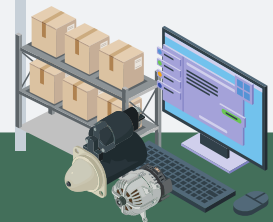

Installation, Tearout & Modernization

Century is equipped to install new material handling equipment, and dismantle unused or defective units, clearing facility space for new operations.

Preventative Maintenance (PM) Contracts

Century can build a custom maintenance schedule for your conveyor system so it's always operating at peak performance.

Parts Organization & Management Program

A program designed to ensure that all relevant system equipment, parts, and devices are inventoried and replenished when consumed.

SKILLS

- Facility Design and Layout
- System Integration
- Project Management
- Mechanical and Electrical Engineering
- Software Design and Engineering
- Facility Maintenance
- On-Site Service and Parts
- System Modernization

OUR HISTORY

Ron Ferrara founded the company in 1981 based in Edison, NJ and focused on material handling systems, installation and conveyor technical service. With hard work and a commitment to focus on customer satisfaction, the company grew to a full-service material handling system integrator serving a variety of industries and applications.

In 2017 Century was acquired by Lafayette Engineering, Inc (LEI) based in Danville, KY and Ontario, CA to become a Nationwide Systems Integrator able to self-perform most of the work required for successful turnkey automated systems.
